Efficiency with every rotation

Having surpassed the milestone that was 50 years of UK innovation, the story of Torin continues.

Since our humble beginnings on the banks of the Naugatuck river in Connecticut USA, we have come a long way changing names, continents, owners, merging brands and innovation in the most efficient electric motor technology, the story of Torin is both eventful and successful.

Of course some things have not changed. Our pioneering spirit and commitment to creativity and quality remain at the forefront of our thinking. We continue to invest in our local community, British engineering and raising the profile of Torin throughout the world.

This commitment has culminated in the opening of our brand new EC Manufacturing & Technology Centre in Swindon UK, allowing the development and launch of several new product ranges. The excitement and anticipation of further growth continues.

Torin undergoes a quiet revolution...

...with an investment of more than £2m, the EC Manufacturing & Technology Centre has newly extended, dedicated capabilities for the production of a highly efficient, whisper-quiet range of centrifugal motorised impellers and fans.

This strengthens Torin's position as a front-runner in the advances of motor and impeller technology. More importantly it allows manufacturers to develop class-leading air movement products and systems, positioning themselves at the forefront of their markets.

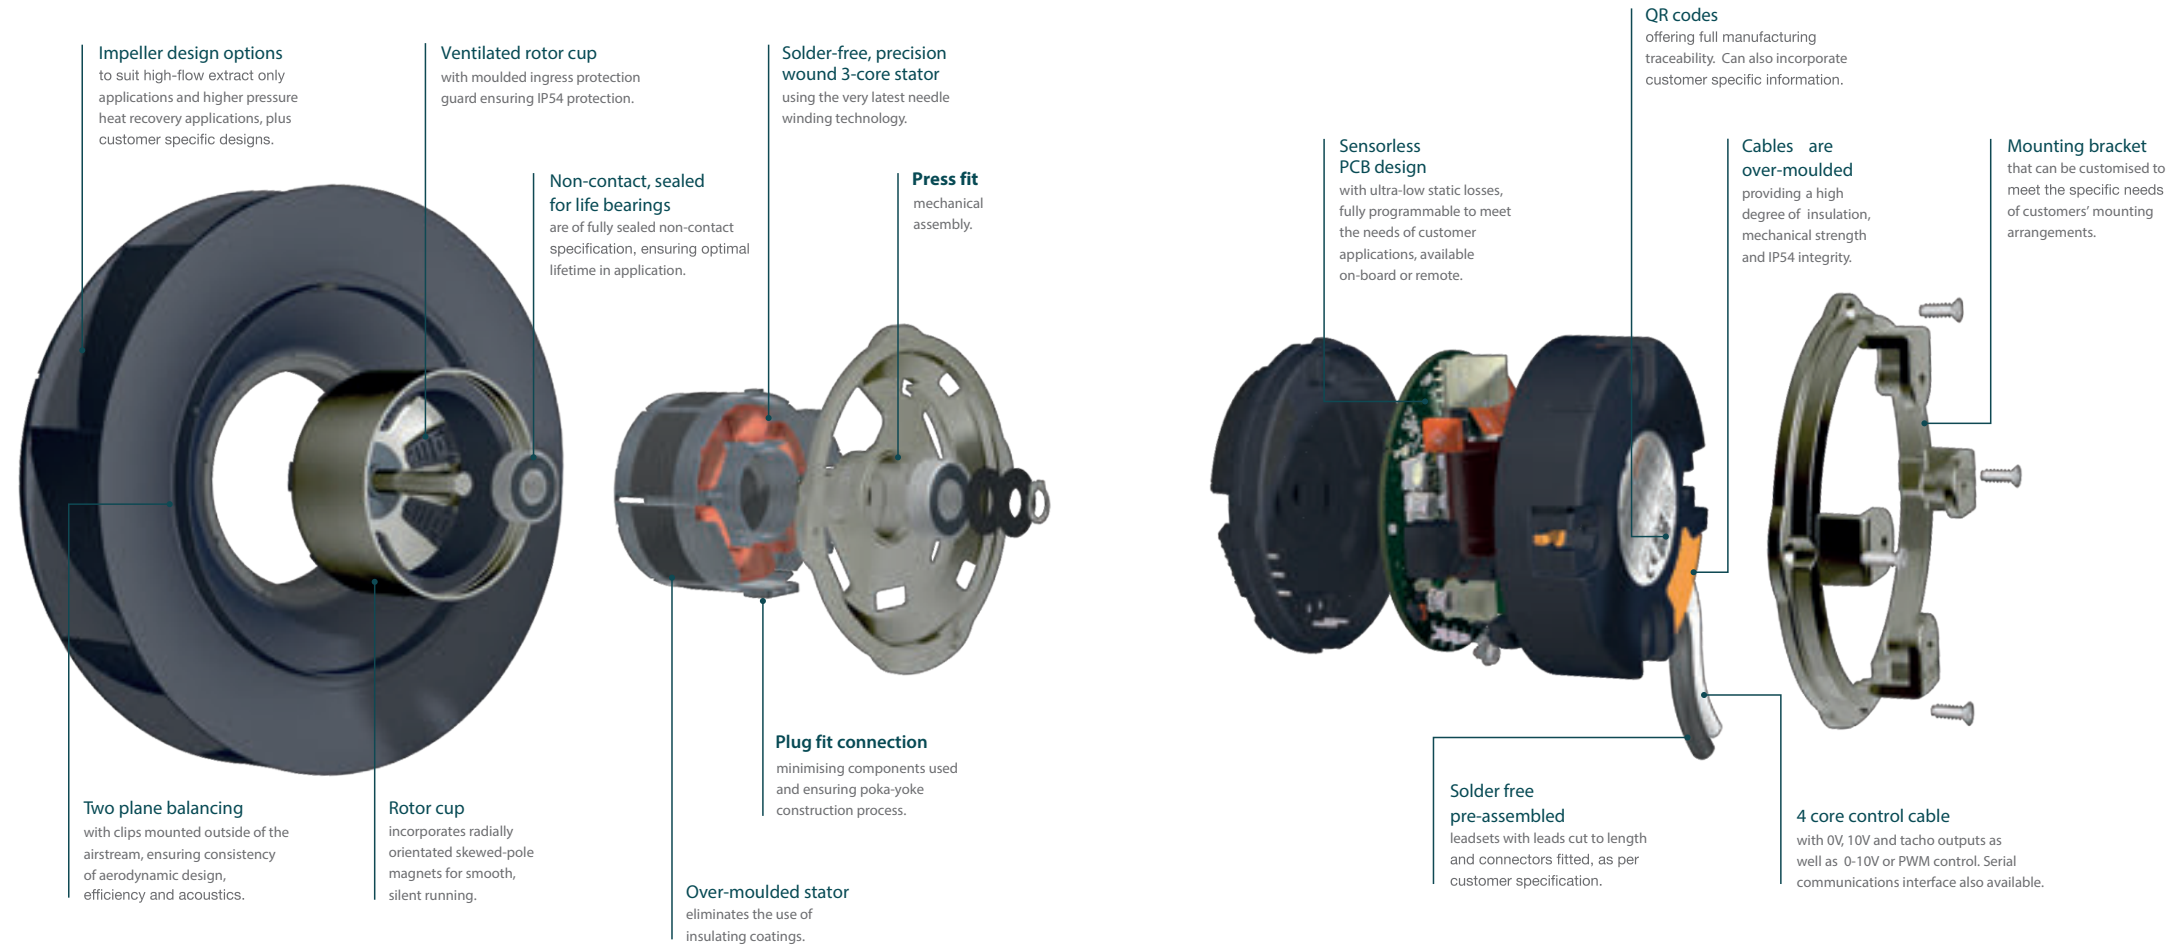

Revolution **360** 

2015

Commitment to R&D is at the very heart of the business at Torin. Continuous product development and advancement programmes have resulted in the design of a revolutionary new range of high efficiency motors, motorised impellers and fans.

Innovate 360

For over 100 years, torin have been a leader in servicing the Air Movement requirements of our customers. From our 13,400 square metre Head Office and manufacturing facility in the United Kingdom, we supply annually 1.5 million products to the International Air Movement Industry.

Our customers are involved in numerous diverse markets ranging from the International Heating, Ventilation, Air Conditioning and Refrigeration industries to Business Machines, Electronics Cooling, Telecommunications and Domestic Appliances, with torin able to offer a diverse range of standard and custom solutions across all of these sectors and more.

We are a truly International business with our sales evenly split between our home market in the UK and numerous export customers, all serviced by our technically competent international sales team. Support is provided by experienced product development and applications engineers backed up by an excellent research and development facility.

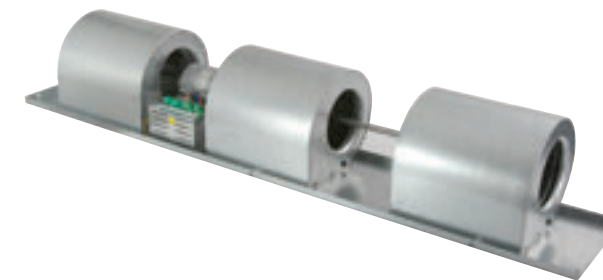

Torin celebrates selling its one millionth EC motorised impeller to the European residential ventilation industry. Torin also became proud members of the European Ventilation Industry Association.

1,000,000

ISH

Torin launch Europe's first fandek product using highly efficient EC Motor technology to the heating and cooling industry.

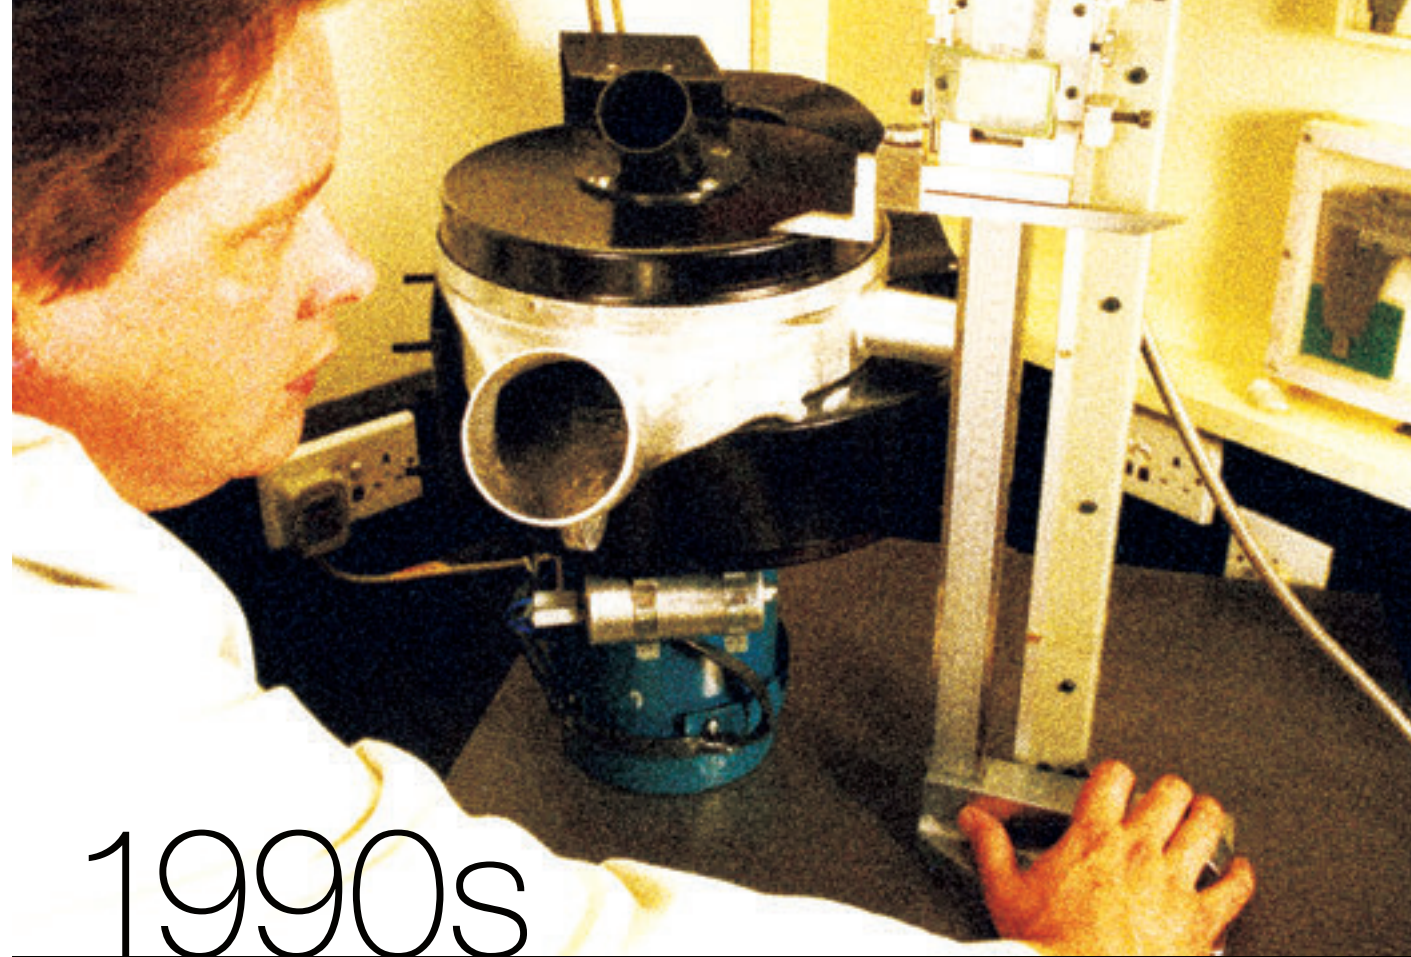

The product enjoyed a flagship launch at ISH 2009, an international exhibition for the building products industry.

The business has gone on to sell tens of thousands of EC Fandek product.

Torin expands its business by applying its technical expertise in brushless EC motor technology to the European residential ventilation market. Torin produces some of the most energy efficient products on the market.

2003

1990s

Torin UK and Sifan Systems merge to form Torin-Sifan Ltd. The integration of Torin brushless EC technology into Sifan blowers allows the business to meet the challenges of energy saving regulations in the European condensing gas boiler market.

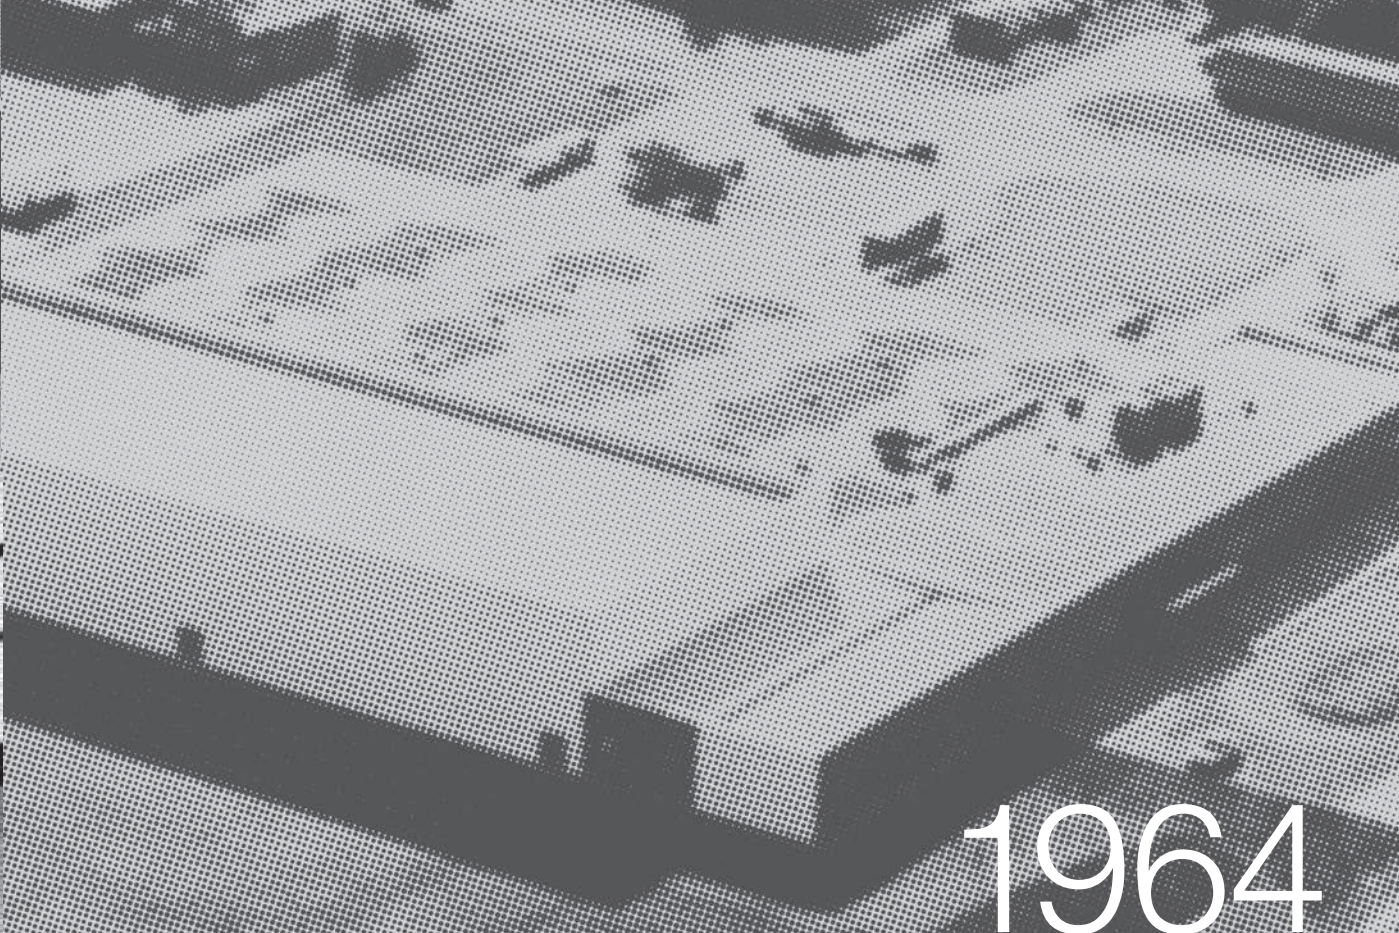

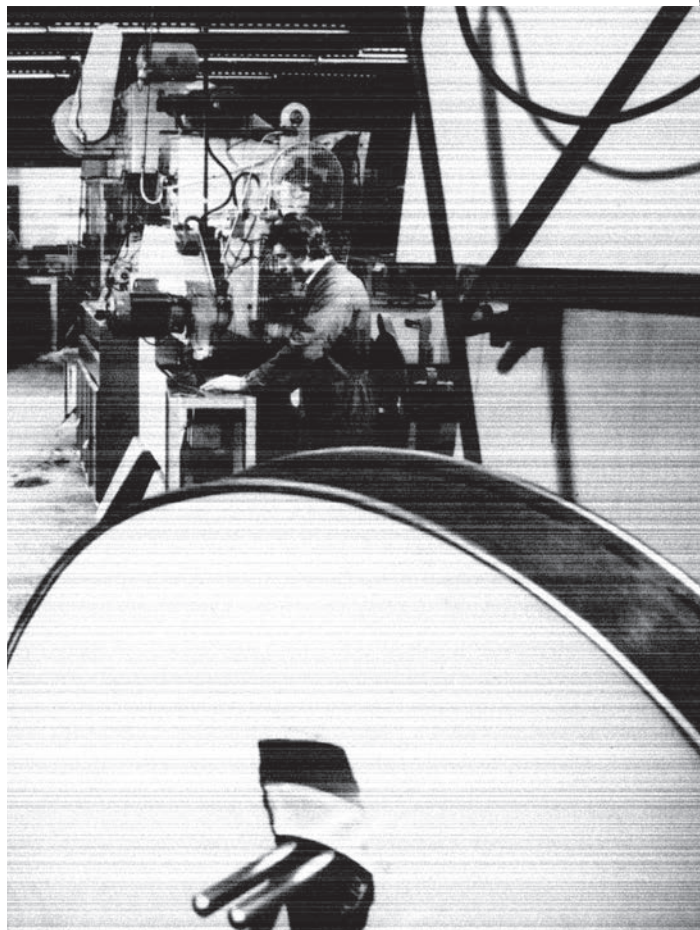

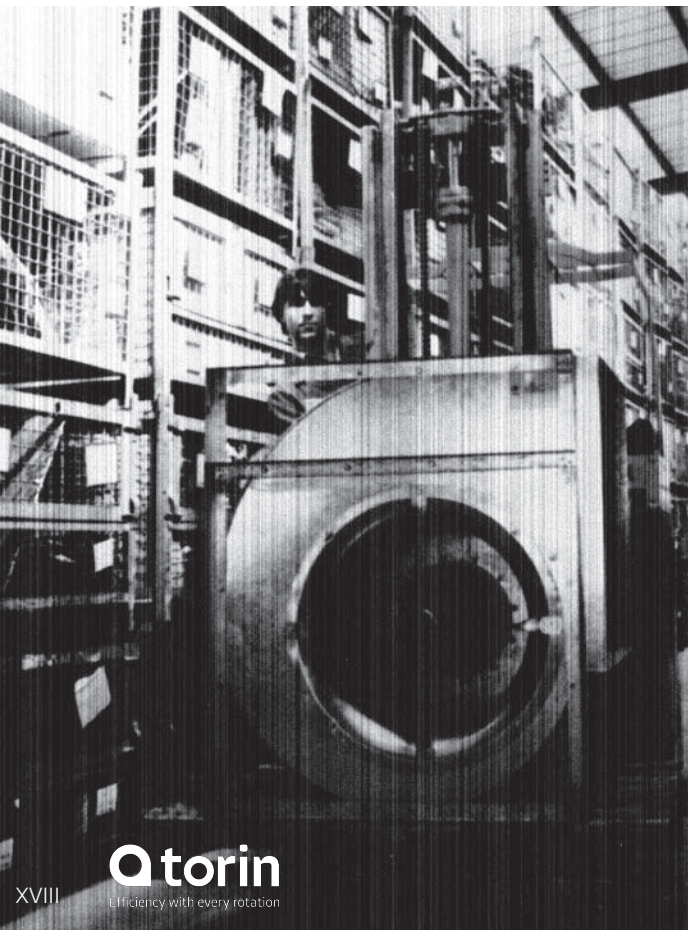

1980s

Torin Ltd. launches its first range of leading edge, brushless EC motors. Designed and manufactured at the Swindon head office. Significant volumes have been sold to prestigious international organisations such as IBM and Xerox.

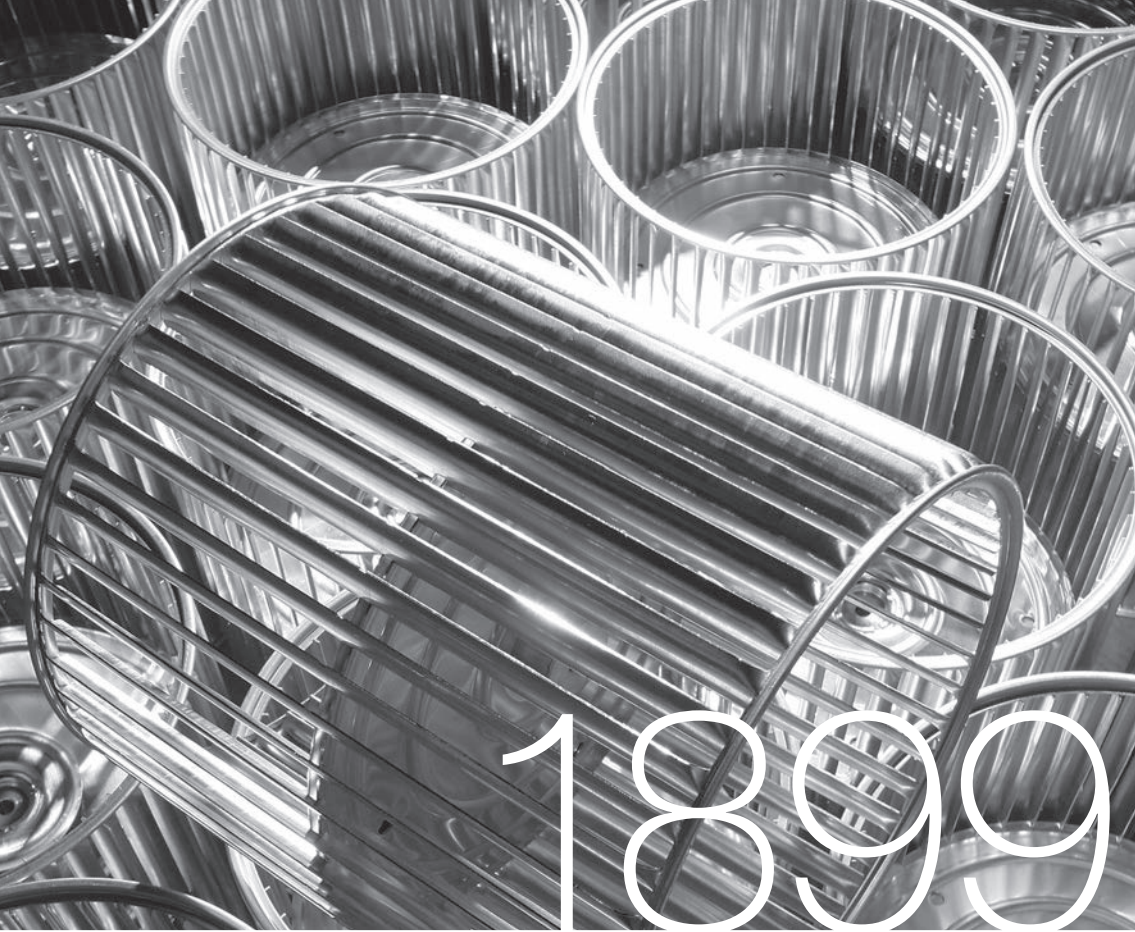

Torin
Limited

1964

Torin UK was established as a subsidiary of the Torin corporation in 1964. A new factory was built and opened in Swindon. This remains the company head office.

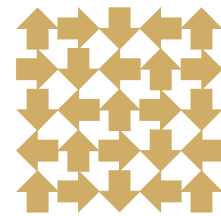

1899

The organisation was established in 1899 in Torrington, Connecticut, USA and was known as the Torrington Manufacturing Company.

TORRINGTON

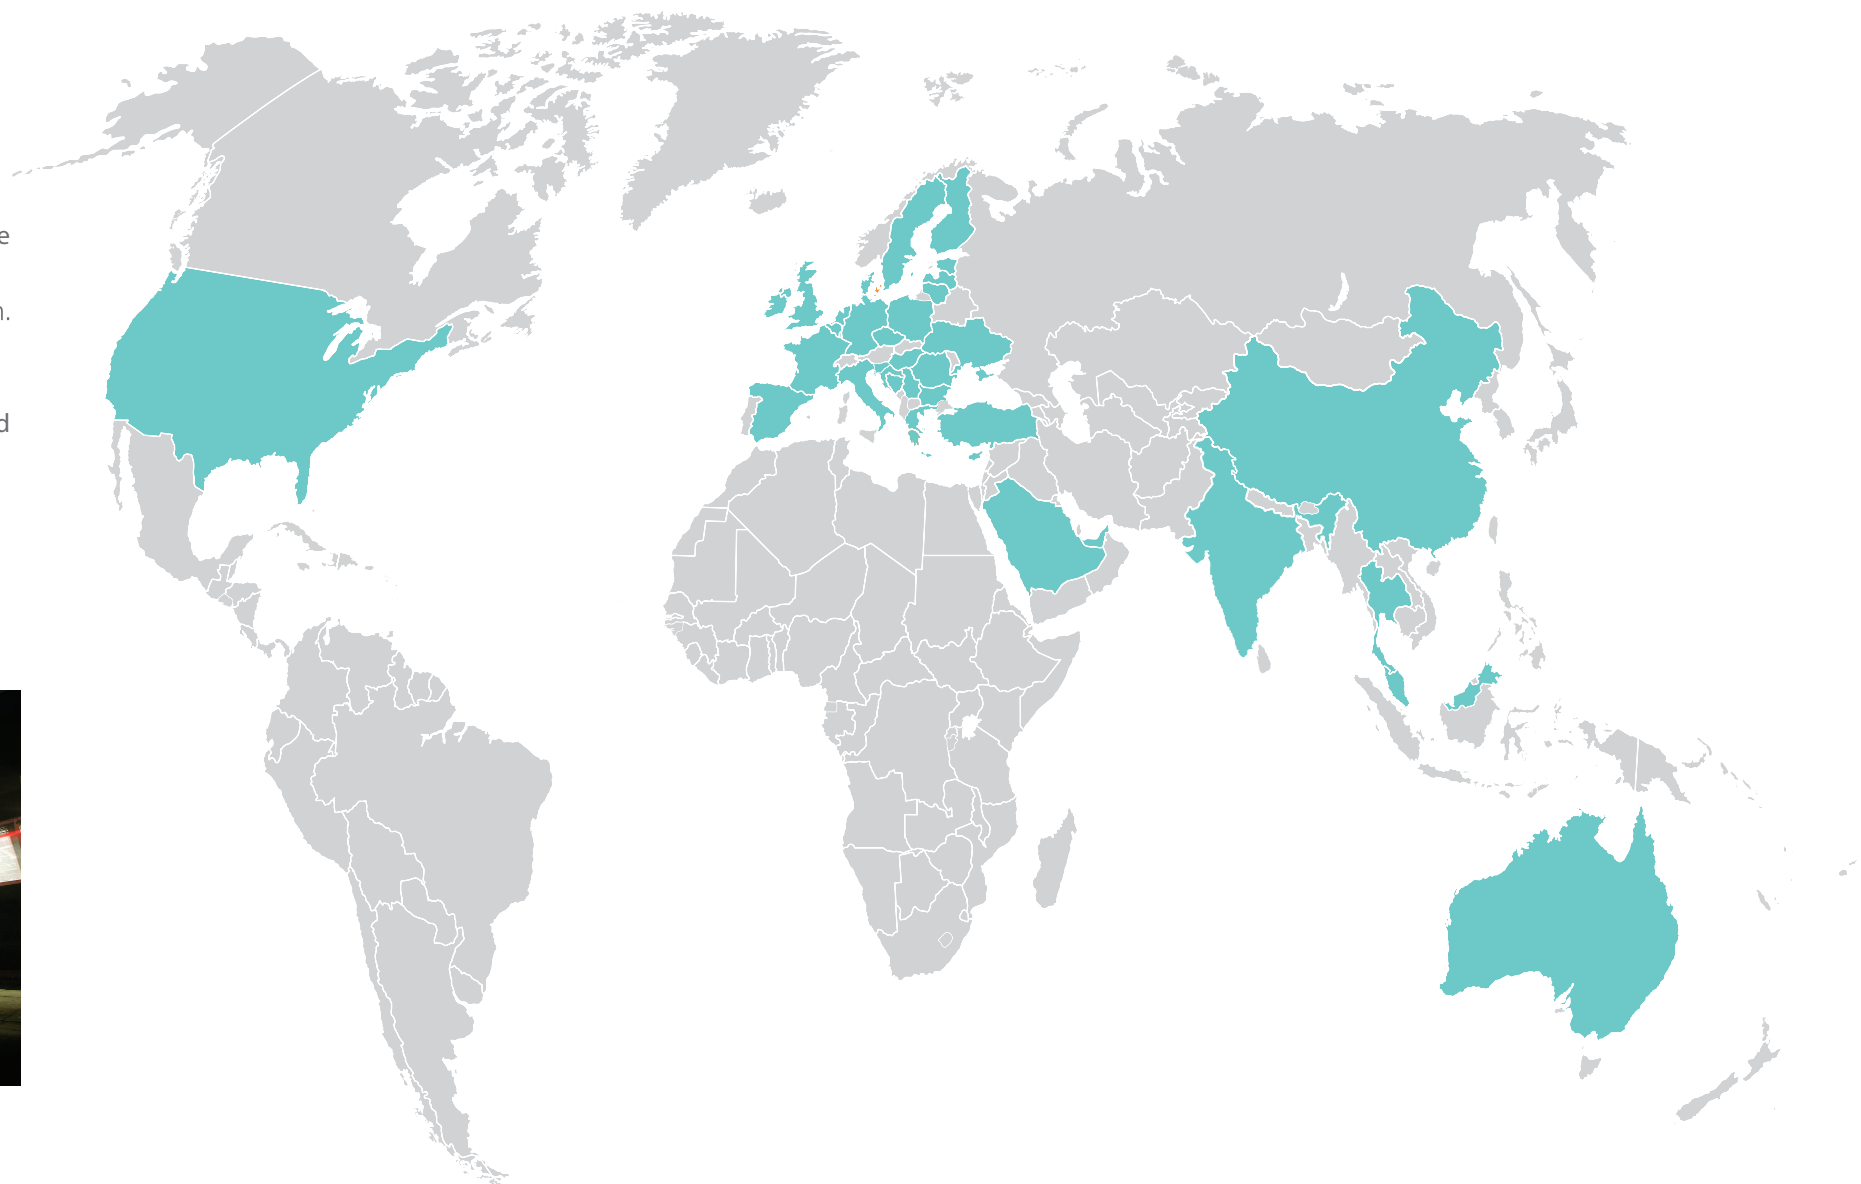

AIR IMPELLER DIVISION PRODUCTS

Global 360[°]

Torin's sales are distributed evenly between the UK and various international markets in Europe, USA and the Asia Pacific region. Torin's product range has proven to be ideal for a diverse range of applications such as the heating, ventilation, air conditioning, household appliance and IT/telecom sectors amongst others.

The new EC Manufacturing & Technology Centre in the UK provides additional capacity to ensure best in-class service levels for the ever increasing demand for high efficiency fans.
